## Why study Economics?

In A Level Economics you'll look at the fundamental forces which affect our lives, such as employment, prices, international trade and poverty. Economists are often in healthy debate with each other over these issues. It is this controversy which makes Economics lively and interesting and which allows you the opportunity to make your own judgements and form your own opinions.

## Extracurricular Opportunities

Visiting speakers Inns of Court visits; work experience

***“Why do some economies grow and others don't? Will the Eurozone survive? Why didn't economists predict the Global Financial Crisis? This course will help you to understand all this and more.”***

## What can Economics A Level lead to?

Studying economics will help you develop transferable skills that will prepare you for studying at university or moving into the world of work. These include skills in data interpretation and essay writing. Suitable higher education courses include economics degrees or degrees in applied economics such as environmental economics, labour economics, public sector economics or monetary economics. You might choose to study business economics, econometrics or a business and management degree. Economics students can follow a wide range of careers in industry, commerce, finance and the civil service.
